

D. James Fusilier

Houston, TX | djamesfusilier@gmail.com | 713-805-9804 | [LinkedIn](#) | [djames.dev](#)

OBJECTIVE

AI product leader and technology founder with hands-on experience building, training, and governing AI systems for enterprise and regulated environments. Seeking a Director-level role where I can bring proven AI delivery expertise, a founder's ownership mentality, and a track record of building responsible-AI governance frameworks to help organizations move from AI experimentation to measurable business outcomes.

EDUCATION

University of Houston-Downtown — Houston, TX

Bachelor of Applied Arts and Sciences (BAAS)

GPA: 3.86 | Tau Sigma National Honor Society

Relevant coursework: Management Information Systems, Business Ethics

Handshake AI / UHD Fellowship: selected as a Software Engineering Expert (RLHF & model alignment)

Lone Star College — Houston, TX

A.A.S., Computer Programming

A.A.S., Mobile App & Web Development

Certifications: Computer Programming Specialist II; Computer Programmer

EMPLOYMENT EXPERIENCE

Founder & Managing Director, AlamoIQ Inc.

Houston, TX — Present

- Lead a Delaware C-Corp holding company that licenses AI model architectures for energy-sector logistics and audit applications, and incubates portfolio AI ventures, including a West African children's AI/ML education platform.
- Set technical direction and AI governance standards applied consistently across portfolio products.

Founder & Managing Director, WeghachiAI Ltd.

Lagos & Port Harcourt, Nigeria — Present

- Built a multi-agent AI reconciliation platform for oil-and-gas revenue assurance, aligned to NUPRC/NCDMB regulatory requirements and deployed as a read-only overlay on client ERP systems within a client-controlled cloud region.
- Designed the four-agent pipeline (ingestion, matching, root-cause analysis, compliance mapping) and the responsible-AI framework behind it: human-verified findings, IAM-enforced read-only access, synthetic-canary recall testing, frozen-baseline drift detection, and acknowledgment-required alerting.
- Led investor engagement and due diligence conversations (Techstars, Launch Africa Ventures, Antler Nigeria) and structured the company's advisory-board and equity framework.

Machine Learning Specialist, Invisible Technologies

Remote — Dec 2025–June 2026

- Support applied machine learning delivery for enterprise AI training and evaluation programs.

AI Trainer, RLHF & Model Alignment, Handshake AI (UHD Fellowship)

Remote — Aug 2025–Dec 2025

- Selected as a Software Engineering Expert to train and evaluate large language models via reinforcement learning from human feedback, with a focus on alignment and response quality.

Generative AI Developer / Prompt Engineer, Outlier

May 2024–Jul 2025

- Designed and evaluated prompts and generative AI outputs across client model-training engagements.

AI/ML Engineer, Fishbowl Software

Oct 2022–Apr 2024

- Built and supported machine learning components within Fishbowl's software products.

AI Solutions Architect, Reserv

May 2021–Dec 2021

- Scoped and architected AI-enabled solutions for Insurtech client use cases.

Mechanical Designer III, TechnipFMC

Apr 2013–Mar 2018

- Designed exploration & production (E&P) equipment — an engineering foundation in spec-driven, safety-rigorous design that now shapes a disciplined approach to AI product design.

SKILLS, HONORS & ACTIVITIES

Skills: Multi-agent AI system architecture · LLM alignment & RLHF · Prompt engineering & evaluation · Responsible AI/governance framework design · Regulatory compliance mapping (NUPRC/NCDMB, COPPA, NDPA, DPDP) · Cloud AI deployment (AWS) · Cross-border delivery & team leadership · Investor relations & term-sheet negotiation · Python

Honors: 3.86 GPA, University of Houston-Downtown · Tau Sigma National Honor Society · Selected, Handshake AI/UHD Software Engineering Expert Fellowship

Activities: Guest presenter, Lagos Business School Breakfast Club (Sept. 2026) · Startup-program applicant/outreach: Techstars, Launch Africa Ventures, Antler Nigeria

ADDITIONAL HIGHLIGHTS

- Founder-level experience standing up AI governance frameworks (human-in-the-loop verification, audit trails, IAM-enforced access) for regulated industries.
- Operates across U.S. and West African markets, including a Nigeria-based delivery entity.
- Combines hands-on technical AI/ML work with P&L- and investor-facing ownership, accustomed to owning a product line, not only a technical workstream.
